Overview of materials provided • *Solar and Hydraulic Robot 12-in-1 Assembly Kit*

The **Sol Expert Solar hydraulics robot 12in1 79500** assembly kit contains 230 individual components that can be transformed into 12 different robot models. The models are operated with solar and water power, so no batteries are needed. The power supply is taken over by a solar cell, and the model starts moving in direct sunlight. Each model has a variety of functional and imitating movements, enabling students to switch between “climbing monkey”, “mouth-opening crocodile”, “T-Rex”, “running bird ostrich”, “scorpion”, “zigzag-driving buggy” and more.

Highlights and Details

- Powered by solar and hydro power
- Especially designed for younger modellers and beginners

Facts

- Dimensions: The largest model is 37 cm high.
- Number of components: 230
- Number of possible models: 12

Delivery

- 230 Components
